Work experience

DOKTOR.SE (September 2019 - Now)

Software and Web developer

I currently work as a front end developer in one of the most prominent healthcare startups in Sweden (2nd largest in Sweden and 3d largest in Europe). I was one of the key developers of the web version of their phone App which launched successfully this year. I am actively involved in developing most of their web based applications making sure the core product and partners implementation are continuously improving during the period of very fast growth for the company.

Technologies: React/Redux, Typescript, Css Modules, Storybook, Node.js, Python

ACCEDO BROADBAND HONG KONG & SWEDEN (September 2015 – August 2019)

Software and Web developer

I was the part of the team that is leading development of multi-platform video applications for prominent global clients. The main tasks include development using custom Javascript framework and team collaboration. Some of the technologies used: HTML5, CSS3, Javascript ES5/6/7, Node, React.JS, Redux, git..

Notable projects: HBO (Samsung, LG), D-Tag (Amazon FireTV), NBA (Samsung), iHeart Radio (Multiplatform), SiriusXM (Multiplatform), CNBC (Samsung), NRK TV (Multiplatform).

CROATIAN EMPLOYMENT SERVICE - CES (May 2011 – September 2015)

Expert advisor in IT department

For 4 years I was working in the IT department of CES institution where I was involved in numerous task with the goal of supporting the core business of the agency. Some of the tasks included application development, project management, IT support for various department, web development and management, social media strategy..etc

Education

UNIVERSITY OF ZAGREB - Master's degree in Economics (2003-2009)

I earned master's degree in economics with speciality in Business Information technology. This allowed me to gain general knowledge in building efficient IT organisation and other aspects of IT management from business perspective. Later I continued to improve my technical expertise with various courses (web design, app development..).

NINGBO UNIVERSITY, PR CHINA - Non-degree language program (2012-2013)

I spent one year in China learning mandarin. It was enjoyable experience where beside learning the language I was able to immerse myself in many other aspects of the life in China.

Skills

IT Skills: Javascript, Node.js, React.js, Vue.js, TypeScript, HTML, CSS, PHP, UI Design (Photoshop / Fireworks /Sketch), Project management.

Language skills: Croatian/Serbian (Native), English (Fluent), German (Basic), Mandarin Chinese (Basic).

Other: Audio production software, Cryptocurrencies trading

Projects

I have worked on numerous freelance project. Since 2014 I was a part of Q-alliance company where I developed Wordpress sites for international clients. In 2018 I also worked part-time for cryptocurrency startup.

From 2020 I am also contributing to the [Eleuther AI](#), an ambitious community of prominent machine learning experts with the goal of developing advanced GPT-like and multimodal systems and releasing them as open source software. I developed their website and some of their internal, web-oriented tools which required a client-facing UI.

You can find more info about my projects on my website: <https://www.jankoprester.com> or Github: <https://github.com/jprester>.

Other information

Music

For a long time I was involved in the field of electronic music, both as Dj and composer/producer. I have released more than 20 tracks on various music labels. I was also responsible for organisation of numerous music events.

Other work

I was one of the reviewers of the “Bootstrap Essentials” book from Pact Publishing.

Since 2014 I am an active member of Effective Altruist community.
